# CHECKLIST

There are six basics you should stock in your disaster supplies kit:

1. Water
2. Food
3. Clothing & Bedding
4. Tools & Emergency Supplies
5. Hygiene Supplies
6. Special Items

### WATER

A normally active person needs to drink at least one quart of water each day. Hot environments and intense physical activity can double that amount. Children, nursing mothers and ill people will need more. Store one gallon of water per person per day preferably in plastic containers with covers. Keep at least a three-day supply of water for each person in your household

### FOOD

Store at least a three-day supply of non-perishable food. Select food that requires no refrigeration, preparation or cooking and little or no water. Select food that is compact and lightweight. Include a selection of food in your Disaster Supplies Kit: Ready to eat canned meats, fruits, and vegetables; canned juices, milk, soup; tortillas, journey cake, bread, etc.; High energy food - peanut butter, jelly, crackers, cereal, vitamins; Comfort/ stress foods -cookies, candy, sweetened cereals, coffee, tea, and baby food

### KITCHEN SUPPLIES

Plastic bags; various sizes, sealable; Plastic plates, cups and utensils

### TOOLS AND SUPPLIES

1. Battery operated radio
2. Flashlight
3. Matches in water proof containers or lighter; can opener, utility knife
4. Paper, pen or pencil
5. Needles, thread, scissors
6. Wrench, pliers, hammer, nails, saw, screwdrivers (flathead & philips)
7. Rope-ideally nylon
8. Plastic sheeting
9. Whistle
10. Duct tape
11. Extra batteries for all devices

### HYGIENE SUPPLIES

1. Toilet paper
2. Personal hygiene items
3. Feminine hygiene products
4. Plastic bags and ties
5. Plastic storage containers
6. Disinfectant / soap / detergent
7. Household bleach

### CLOTHING AND SUPPLIES

1. Include at least one complete change of clothes and footwear per person
2. Sturdy shoes or rubber boots
3. Hats, raincoats
4. Blanket, sleeping bags, cots, foam, mosquito nets, small pillows and cushions

### SPECIAL ITEMS

Remember family members with special needs, such as infant, elderly, or disabled persons.

**For babies:**
**For adults / elderly:**

1. Bottled water
2. Formula or powder milk
3. Diapers
4. Bottles
5. Medication
6. Extra clothing
7. Baby wipes and skin oil

**For pregnant women:**

- Extra eye glasses / contact lens
- Hearing aids and batteries
- Dentures
- Prescription medications
- Contraceptives
- Wheel chairs/Walking aids

- A small kit for mother and child in case of an emergency delivery

INSURANCE CORPRATION
OF BELIZE LTD.

ICB is committed to helping you, our valued policyholder, in being prepared for storms. This is why since 1982, ICB has been providing you with professional service and up-to-date information regarding insurance and storms. This brochure is a part of that effort. Our staff is ready to assist you with emergency preparations. Together we can weather any storm. The ICB tradition of caring for our communities extends far beyond hurricane season. Day in and day out, we are here for Belizeans.

icb@icbinsurance.com

www.icbinsurance.com

223-4194

# HURRICANE FLAGS

| | | |
|---|---|---|
| 🟥 | ALERT<br>First Phase<br>May threaten within 72 hours | PRELIMINARY<br>21 ° N 80 ° W |
| 🟥 ● | WATCH<br>Second Phase<br>May threaten within 36 hours | RED I<br>20 ° N 84 ° W |
| 🟥 ● ● | WARNING<br>Third Phase<br>Likely to strike within 24 hours | RED II<br>20 ° N 85 ° W |
| 🟩 | ALL CLEAR<br>Fourth Phase<br>Hurricane has passed | |

# HURRICANE SCALE

| | |
|---|---|
| **Tropical Storm** | Winds 39-73 mph |
| **Category 1 Hurricane** | Winds 74-95 mph |
| **Category 2 Hurricane** | Winds 96-110 mph |
| **Category 3 Hurricane** | Winds 111-130 mph |
| **Category 4 Hurricane** | Winds 131-155 mph |

# PET SAFETY TIPS

**THINK AHEAD** Talk to a friend or family member who lives in a secure area. Ask if their home would be open to you and your companion animal should a storm threaten.

**PLAN AHEAD** Always be prepared with identification, vaccinations, proper collars, and stock up on plenty of pet food. Do not leave your pet at home during a hurricane. A secure room and a few days' food and water do not necessarily mean safety for your pet.

**AFTER THE STORM** Take caution in allowing your pet outdoors after the storm has passed. Familiar scents and landmarks may have been altered and your pet could become confused or lost. Downed power lines could present danger. Do not to allow your pet to consume food or water which may have become contaminated.

# WHEN A HURRICANE THREATENS

There are two types of official warnings:

1. A "hurricane watch" means that a hurricane may strike an area within 36 hours.
2. A "hurricane warning" means a hurricane is expected to strike in 24 hours or less. Pay close attention to official announcements on television and radio from the National Emergency Management Organization (N.E.M.O.). Do not pay attention to rumors. When a hurricane watch is announced, take these steps:

## FOOD & WATER

Turn your refrigerator and freezer to their coldest settings, and open it only when absolutely necessary. Freeze water in plastic jugs and use them to fill empty space in freezer to keep food cool. Prepare your emergency water supply before the hurricane strikes. Plan to have one quart of drinking water per person, per day. Additionally sterilize the bathtub, jugs, bottles, cooking utensils and other containers. Scrub thoroughly, sponge and swab with bleach, then rinse. Let the tub and other containers dry, and then fill them with water. This water can be used for sanitary purposes.

## PROPERTY

•Begin latching your shutters or installing pre-cut plywood over your windows and doors. Taping windows will not prevent shattering but may reduce flying glass.

•Unplug unessential appliances.

•Bring in objects that can be blown away, such as garbage cans, garden tools, furniture and plants. Anchor objects that cannot be brought inside.

•Prepare your vehicle. Fill your fuel tank early. Fuel may not be available for days after the hurricane.

## STORE VALUABLES AND DOCUMENTS

Place valuables and personal papers in waterproof containers and store them in highest possible place. Use plastic bags for large items. Make sure you have sufficient cash.

## BOAT OWNERS

If you own a small boat on a trailer, store it inside a garage or warehouse. If you leave your boat outside, attach the trailer tongue to something firm in the ground, let the air out of the tires and make sure the boat is tied to the trailer. If you keep your boat in a marina, read your contract very carefully. Some marinas require you to remove your boat from their facilities at the time a hurricane watch is announced. The safekeeping of your boat is your responsibility.

# DURING A HURRICANE

Weather conditions may deteriorate rapidly, hours before the arrival of the hurricane. **Stay indoors.** An interior room or a room without windows is usually safest.

**Passage of the hurricane eye:** If the center (eye) passes through your area, continue to stay indoors unless emergency repairs are absolutely necessary. Wind and rain may stop for a few minutes to more than an hour.

**Beware:** The wind will suddenly pick up from the opposite direction and possibly with greater force than before. Stay inside a well-constructed building. In structures, such as a home, examine the building and plan in advance what you will do if winds become strong. Strong winds can produce deadly missiles and structural failure. If winds become strong:

- Stay away from windows and doors even if they are covered. Take refuge in small interior room, closet, or hall way. Take a battery-powered radio or TV and a flashlight with you to your place of refuge.
- Close all interior doors. Secure and brace external doors, particularly double inward opening doors and garage doors.
- If you are in a two-story house, go to an interior first floor room such as a bathroom, closet, or under the stairs
- If you are in a multiple-story building and away from the water, go to the first or second floors and take refuge in the halls or other interior rooms away from windows. Interior stairwells and the areas around elevator shafts are generally the strongest part of a building.
- Lie on the floor under tables or other sturdy objects.

Insurance Corporation of Belize

# AFTER A HURRICANE

Remain indoors until the official "all clear" is given. Continue to monitor television and/or radio on your battery powered unit. Television and radio stations will be issuing official announcements from the National Emergency Management Organization and local officials. If you have evacuated, do not return home until officials announce that your area is ready. Be sure to have proof of residency, such as driver's license, etc.

**Telephone communication:** Do not use your telephone unless you have an emergency. Do not call emergency services except for life threatening situations. Do not report individual interruptions in electric, water, or telephone service. These companies have plans to restore service as quickly as possible. However, call the police or utility companies to report downed power lines or broken water mains. Report individual trouble only after service has been generally restored to your area.

**Water:** Water supplies may be contaminated during a hurricane. During this time, use only your pre-stored water for drinking or cooking.

**Check food:** Before using any food from the refrigerator, be sure to check it for spoilage.

**Avoid injuries:** Careless equipment use causes the greatest number of post-storm injuries. Be careful with open flames. Avoid carbon monoxide injuries, by using kerosene stoves outside (never inside) your house. When cutting up fallen trees, be extremely careful, especially if you use a chain saw. Serious injuries can occur when these powerful machines snap back or when the chain breaks.

**Portable power generators:** Connecting a portable generator to home wiring can cause safety hazards. Before using a portable generator, it is important to turn off electricity at your main circuit breaker or fuse box. Disconnect portable generators before turning on power to your home. A portable generator should only be operated OUTSIDE the house. You can then run a heavy duty, properly grounded extension cord inside to power your electrical appliances.

**Electrical safety after a hurricane:** Do not touch fallen or low- hanging wires of any kind under any circumstances. A wire that seems harmless could be crossed with a live wire. Treat every power line you see as deadly. Whether it's on the ground, hanging loose, or attached to an object-do not touch it. Stay away from puddles with fallen wires in them. Call BEL immediately to report hazards such as downed power lines.

"Making a Positive Difference

# TERMS TO KNOW

**TROPICAL WAVE OR DISTURBANCE:** A cluster of clouds and/or thunderstorms without an organized circulation, moving through the tropics.

**TROPICAL DEPRESSION:** An organized system of clouds and thunderstorm with a defined circulation and top winds of less than 39 mph.

**TROPICAL STORM:** An organized system of strong thunderstorm with defined circulation and top winds of 39 to 73 mph. Tropical storms can quickly develop into hurricanes Storms are named when they reach tropical storm strength.

**TROPICAL STORM WARNING:** Tropical storm conditions are expected in the specified area of the warning within 24 hours.

**HURRICANE:** An intense tropical weather system with a well-defined circulation and a sustained wind speed of 74 mph or higher.

**STORM SURGE:** A dome of sea water up to 20 feet high that arrives with a hurricane and can affect as much as 100 miles of coastline. Evacuation zones are identified by their likelihood of being flooded by this rising water which is responsible for most hurricane deaths.

**HURRICANE WATCH:** Hurricane conditions are possible in the specified area of the watch, usually within 36 hours. During a hurricane watch, prepare take immediate action to protect your family and your property in case a hurricane warning is issued.

**HURRICANE WARNING:** Hurricane conditions are expected in the specified area of the warning within 24 hours. Complete all storm preparations and evacuate dangerous or low-lying locations as soon as possible.

# PLOTTING A STORM

Hurricane center positions are given by latitude and longitude. For example: the storm's center is located near 26.5 degrees North and 59.0 degrees West On the chart, read North to 26.5 degrees and than West to 59.0 degrees as on the map.

# BEFORE A HURRICANE THREATENS

The hurricane season begins June 1 and ends on November 30. Belize can be threatened by a storm at any time during that period. Take these steps before a hurricane watch or warning is announced:

- Review your insurance policy to ensure it provides adequate coverage.
- Check that your emergency equipment is in good working order and that you have enough supplies to last for at least two weeks.
- Obtain and store materials necessary to properly secure your home.
- Keep trees and shrubs trimmed. Cut weak branches and trees that could fall and impact the house. Do not trim trees and shrubs after a hurricane watch or warning has been announced. Trash pickup will be suspended and your trash can become dangerous projectiles propelled by the hurricane's high winds.
- If you expect to evacuate your home, plan in advance where you will stay, how you will get there, and the supplies that you will take.
- If you need transportation to a public shelter due to a special need- such as age, physical disability, neurological or psychological disorder register with your district's emergency committee.
- If you or a family member receives home health care or depend on electrical life-support equipment, discuss emergency plans with your agency representative and physician. If necessary, make arrangements now with a hospital to stay there if you must evacuate.
- If you have elderly friends or relatives who will stay with you during a storm, keep a list of their prescribed medicines and include them in your emergency plans. Plan now when you will take care of their property and pick them up

**Plan to evacuate if you...**

- Live in a high-rise. Hurricane winds are stronger at higher elevations. High-rises are susceptible to conditions that can cause uncontrollable fires during high winds, when it will be impossible to get emergency help. Glass doors and windows may be blown out of their casings, and weaken the structure.

**Plan your evacuation alternatives now...**

- Stay with friends or relatives or at a low-rise inland hotel.
- Relocate outside the evacuation area. Leave early to avoid heavy traffic and roads that could be blocked by early floodwater.
- As a last resort, go to a shelter. Hurricane shelters will be available for people who have no other place to go. If you must seek public shelter, watch your local television stations, if broadcasting, and listen to your local radio stations for announcements of which shelter will be open.

**REMEMBER:** Do not go to the shelter until you hear an announcement that it is open.
